

Zoom 仕様変更に伴う、特定条件下における自動プロビジョン不可事象について

別紙 1

差出人 : Zoom Video Communications support@zoom.us

Dear Valued Customer,

We noticed that you weren't using our 'Associated Domains' tool for 5 unassociated domains. The Associated Domains tool allows you to prove that you own and manage specific domain names.

To further enhance the security of your account, starting **November 30**, any new users created that don't match an associated domain will be sent an email to verify their email address. Additionally, if you use our 'automatic provisioning' functionality for SCIM/AD Sync or the 'auto activate' tool for Rest APIs, it will only provision users with an address matching one of your associated domains.

To start using this tool, please see our [Support Page](#) on how to associate domains with your account. If you have any questions or concerns, please contact your Customer Success Manager or our Support Team.
